## INVITED SESSION SUMMARY

**Title of Session:**

Emerging Research Leaders of Medical Informatics in KANSAI Area

**Name of Chair:**

Tomohiro Kuroda

**Details of Session:**

Introduction of Information and Communication Technologies (ICT) have been changed clinical activity and medical researches drastically in these decade. Especially in Japan, licensing electronic medical record in 1999 emerges rapid introduction of ICT in these decades. This rapid change enabled young researchers to tackle innovative academic challenges in medicine.

In this session, we invite four emerging young researchers of medical informatics in KANSAI area. The series of presentations of emerging research topics in medial informatics may provide the chart and compass to sail frontier ocean of medical informatics.

This session is specially co-organized with the Kansai branch of Japanese Association of Medical Informatics (JAMI-KANSAI) and Kansai Medical Informatics Forum (KMI).
